

## Clean gold, a smart way to give a significant impact!

Have you ever encountered the term "blood diamond" ? Well, a big part of the dream industry of luxury has unfortunately a dirty side of the story. We still love beautiful jewelry and would be very happy if someone presents you a memorable piece or if we have a good reason to indulge ourselves with a piece. So let's start considering the option of clean gold. We can offer, on demand, special pieces of high jewelry with a clean consciousness either ready made or custom made.

## We just came back from Paris .....with new ideas and more hip products

We met new people, we renewed contact with our faithful partners in chilly yet beautiful Paris. Trendy collection of silk bags from Cambodia , silver jewelry from Kenya, a new line of organic cotton lounge wear, a new jewelry line from our best seller pull top collection, etc, etc. We are expecting the arrival of new products in early spring. Look forward to it!
